

Introducing Bellaboo's Fall Discovery Trip

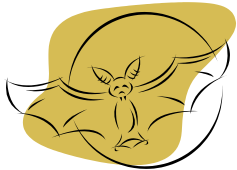

designed for Pre--k to 3rd grade

Peter Peter Pumpkin Eater

This special Autumn program was designed to get your students jumping into fall fun. They will go on a Pumpkin Hunt in search of a great big pumpkin. Moving and grooving their way through our imaginary pumpkin patch with impromptu visits from a “knowledgeable” Scarecrow will make this an interactive experience you will fall for. From beginning to end, your young Pumpkin Hunters will practice sequencing skills as they create a traditional fall masterpiece and “My Size Pumpkin Pies.”

Another Fall Favorite

BAT—Our mascot is an Indiana Bat. Bats are friends of nature. They are valuable to our habitat by eating insects, pollinating plants, and spreading seeds. During your educational field trip, your students will explore with their hands, minds, body and senses to learn about how bats interact with and contribute to our environment. We will dispel any myths our young visitors may have about bats, and replace them with factual information about these amazing mammals. Your students will learn how bats use echolocation to find food, and fly safely in the darkest places. In addition, your students will participate in an interactive experiment by using their senses, like a bat does, to locate and identify their offspring.

Peter Peter Pumpkin Eater

Is only available in September & October
