

Introducing Bellaboo's Winter Discovery Trip

designed for Pre--k to 3rd grade

Silly Snow Science

Attention Cool Young Scientist!

This is the Discovery Trip for you! Enjoy the wonders of snow and ice by investigating the 3 phases of water. Transform liquid into a solid right before your own eyes in Children's Cooking. Yummy Snowball Ice Cream will melt in your mouth.

Experience first-hand how ice reacts to various temperature changes in our "science lab". Silly Snow Science is perfect for early childhood through 1st Grade. This program is only offered in the snowiest of months, so don't delay!

Call to book **Silly Snow Science** for your student's today.

Note: Silly Snow Science can only accommodate up to 100 students per trip.

Other Winter Favorites

NCIS- (Nursery Children Investigate and Solve)-

This interactive learning experience helps pre-school and kindergarten students to practice their problem solving skills. Your young sleuths will strap on their listening gear and investigate the clues. They will use their knowledge of Nursery Rhymes to help solve a Mother Goose Crime- The Mystery of the Empty Bucket. They will discover "Who Stole the Cookie from the Cookie Jar" during our children's cookie activity by following step by step instructions.

Stuffee-

Children love Stuffee, our 8' cloth doll with soft removable internal organs. Through this educational field trip, your students will learn about the body systems. They will learn how nutrition, good personal hygiene, rest and exercise are essential to maintaining a healthy body. Our young visitors will participate in a science quiz game show about the body parts. They will explore and act like young doctors as they listen to Stuffee's heart. Your students will also use their knowledge to place the body organs where they belong.

Silly Snow Science

Is only available December-February.
Book your trip today.
